The LMA™ Portfolio
Re-usable

The LMA™ laryngeal mask portfolio is supported by over 3,000 published references and more than 300 million patient uses.
LMA ProSeal™
Proven Versatility

The LMA ProSeal™ includes all the benefits associated with an LMA™ airway:

- Less drugs.¹
- Fewer sore throats in adults.²
- Reduced coughing and bucking on emergence.²
- Improved haemodynamic stability.²

The gastric drain tube enables confirmation of correct mask placement and sealing with the upper oesophageal sphincter. A patent drain tube reduces the risk of stomach insufflation.

For the latest clinical evidence on the LMA™ re-usable portfolio visit doctorevidence.com/LMA
LMA Flexible™
Truly Flexible

- **Designed for Shared Airways** – LMA Flexible™ allows the tube to be moved out of the surgical field without displacement of the cuff, or loss of seal for the anaesthetist.

- **Improved Recovery Profile** – children undergoing adenotonsillectomies with LMA Flexible™ spent significantly less time in the operating room after surgery, had a lower incidence of airway irritation and experienced lower postoperative pain in the first 4 hours vs an ETT.³

- **Patient Protection** – LMA Flexible™ acts as a barrier, preventing soiling of the glottis or trachea by blood or secretions from above.⁴
